

Indicative Early Redemption Price
USD 947.70
Investment objective

The MCB Europe US Quality Note is a 100% capital guaranteed product offering exposure to the positive performance of the **Solactive Europe US Qualité Index (EUSAQ)**. The note is designed to provide investors with at least 104% of their initial capital at maturity plus a participation to the positive performance of the Reference Index. The Reference Index is reviewed and rebalanced on a quarterly basis and is constituted of: (i) a 130% long exposure to at least 25 companies listed in the US and the major European exchanges and that obtain the highest qualitative score as determined by Solactive's rigorous analysis process which looks at profitability, return on assets, operating margin, leverage ratio, dividend payout and volatility; and (ii) a 30% short exposure to at least 15 companies which obtain the lowest quality score. This geographic diversification across Europe and the US enables investors to take advantage of the performance potential of two of the main markets driving the global economy as well as benefit from their differing economic trends.
